

TWIN SCREW PUMPS

TS series

HYGIENE BIOTECHNOLOGY INDUSTRIAL

The TS double screw volumetric pump is made entirely of stainless steel with contact surfaces designed according to the latest hygiene design requirements.

Suitable for major industrial applications such as in the food, dairy, cosmetic and pharmaceutical sectors, and for CIP washing and SIP sterilization processes.

Its construction makes it excellent for pumping delicate, viscous liquids, and products containing suspended solids, or for high viscosity fluids.

Suitable for high differential pressures, it has an excellent suction capacity and a reduced level of pulsations; no foaming even with high gas content.

Compact dimensions in relation to the performance provided, high volumetric efficiency, no contamination of the pumped product and no transfer of parts subject to wear.

The TS double screw pump is available in standard version with flexible coupling and motor, and in TSM close-coupled version.

PRODUCTS AND PROCESSES

Pumping applications

- Liquid food and beverages, dairy fluids, confectionery products, pharmaceutical and biotechnological fluids, cosmetics and fine chemicals.
- Fluids with suspended solids that must not be damaged.
- Fluids with suspended gas.

Typical products

- Food sector: fruit and vegetable juices, purees and concentrates, beverages also with suspended particles, syrups, spirits, chopped tomatoes, chopped vegetables, fruit salads, thick soups and gastronomic preparations, chocolate and custards ice creams.
- Dairy sector: milk, cream, soft cheeses, yogurt, curds, ricotta.
- Cosmetic and pharmaceutical sector: general pharmaceutical fluids, cosmetics, creams, gel and shampoos, detergents.

FEATURES

- All parts in contact with the product are made from AISI 316L stainless steel with surface finishes lower than Ra 0.8 micron. They are designed according to the latest hygiene design requirements. EHEDG/3A certified execution on request.

- Support entirely made of AISI 304 stainless steel.
- Shaft synchronisation by means of optimised spiral profile toothed wheels.
- High resistance stainless steel shafts supported by oil bath bearings.
- Single or double flushed, balanced hygienic mechanical seals.
- Connections series DIN 11851, 11864, Clamp (DIN o ISO), SMS, RJT, flanges and special accessories.
- EPDM, FPM and HNBR gaskets compliant with EU Reg. 1935/2004 and FDA; other materials on request.
- Motor shaft with key for coupling with flexible coupling to the motor drive.
- Wide range of optional accessories available to meet all market requirements, such as surface hardening treatments, stainless steel base or carriage installation, version with hollow space, by-pass, flow or pressure sensors.
- TSM close-coupled version available for some models.

Available with different screw profiles to provide the best performance according to the type of installation.

- For high capacity
- For high pressure
- For delicate fluids with suspended solids

PERFORMANCE AND TECHNICAL DATA

Operating features with clean water at 20°C

Capacity 0 - 15 m³/h TSM50;
0 - 20 m³/h TS65-TSM65;
0 - 30 m³/h TS70-TSM70;
0 - 50 m³/h TS80;
0 - 80 m³/h TS90;
0 - 150 m³/h TS100.

Differential pressure up to 18 bar depending on the type of rotors.
Maximum operating pressure 25 bar (PN 25).
Temperature range -10°C ÷ 130°C.
Product viscosity up to 1.000.000 cP.

MECHANICAL SEALS

The TS range twin screw pumps can be supplied with different shaft seals according to the application:

A - SINGLE MECHANICAL SEAL

The single mechanical seal is a balanced hygienic cartridge type and is standard for low rotation speed applications and/or with non-viscous products.

MATERIALS:

- Silicon carbide / Silicon carbide
- Moulded gaskets in: EPDM, HNBR, FPM and, on request, FFKM

This execution can also be set up with an external cooling quench, using an optional radial seal ring.

B - DOUBLE FLUSHED MECHANICAL SEAL

The double mechanical seal is a balanced hygienic cartridge type. The ideal solution for all low speed applications with viscous process fluids and high rotational speed CIP processes.

MATERIALS:

- Silicon carbide / Silicon carbide
- Moulded gaskets in: EPDM, HNBR, FPM and, on request, FFKM

OVERALL DIMENSIONS

Dimensions not binding - DN = DIN 11851 male threaded connections with standard IEC/EN motors
